“Through prevention, education, and building trusting relationships, I help them make informed decisions that improve their quality of life and give them more good days,”

About Alexandra Miller, MD

Dr. Alexandra “Alex” Miller has wanted to help people since she was a child. "I found medicine to be the best way that I could serve my community," she says. She has a special place in her heart for the senior population. "They have spent their entire lives caring for others — they deserve to be cared for now," she says. Dr. Miller builds strong relationships by listening first and taking the time to truly get to know her patients as people, understanding their goals and making them feel heard and respected.

Dr. Miller is passionate about empowering her patients to take control of their health. "Through prevention, education, and building trusting relationships, I help them make informed decisions that improve their quality of life and give them more good days," she says.

When not with patients, Dr. Miller enjoys spending time with her family, going to the beach, trying new restaurants, relaxing by the pool, and traveling.
