“There is nothing more rewarding in life than taking care of people and saving lives.”

About Paola Daza, MD

Dr. Paola Daza believes “there is nothing more rewarding in life than taking care of people and saving lives.” As a family physician, she understands the importance of prevention and education in healthcare. “There is so much that I can teach but also so much that I can learn from patients,” she explains. Dr. Daza considers it an honor to serve each of her patients and says it makes her proud to see them “changing their behaviors and becoming healthier.” Dr. Daza wants patients to know that they can trust her, and she will always do her best.

When not with patients, Dr. Daza can be found spending time with family. “Family is the strong pillar of my life,” she says. Dr. Daza also enjoys reading, watching movies, and solving puzzles.
