“Being entrusted with monitoring and improving my patients’ health and quality of life is an honor.”

About Rochelle Marill, MD

Dr. Rochelle Marill has always known she wanted to work in healthcare. As a second-generation primary care doctor, and having been exposed to the clinical and administrative aspects of medicine at a young age, she felt it was her calling.

“Being entrusted with monitoring and improving my patients’ health and quality of life is an honor,” says Dr. Marill. “I make a difference by being knowledgeable, involved, caring, and more than anything, available in their time of need.”

Dr. Marill likes spending quality time with her family, going to the beach, eating at new restaurants, running and yoga. Her favorite place she has visited is Santorini, Greece. Dr. Marill and her husband have a daughter.
