

**“Treat everyone with the time and care needed for noted pathologies.”**

#### **About George Zislis, DPM**

Dr. George Zislis says he enjoys “helping patients get back on their feet.” Compassion is key in his practice. “There are times where there is an instant gratification, and there are times where it can be a long process, but educating patients on their pathologies and setting realistic expectations is the key to mutual goal setting for both the physician and patient,” he explains. He adds that he always begins with a “thorough physical examination” and strives to “treat everyone with the time and care needed for noted pathologies.”

In his free time, Dr. Zislis loves spending time with family and friends. He especially enjoys grilling and cooking with his fiancé. He also likes playing outdoor sports.
