“Each day presents an opportunity to touch a life to provide comfort, hope, and healing.”

About Md Sakib, MBBS, APRN, FNP-BC, MSN

Md Sakib’s passion for medicine extends beyond an interest in science, rather he feels called to serve. This passion was ignited after witnessing “the profound impact that compassionate healthcare can have on individuals and their families.” He finds “great joy” in conversing with patients and believes that strong relationships are built upon “trust, empathy, and active listening.” He aims to be present with patients and “foster a collaborative journey toward health.” He adds, “Each day presents an opportunity to touch a life to provide comfort, hope, and healing.”

Md Sakib can be found spending his free time with family or enjoying the tranquility of fishing. He also loves traveling and sampling new cuisines.
