About Sharon Wood, NP

Sharon Wood has built her career around a simple but powerful belief — helping people makes a difference. "I receive a lot of gratification from helping people," she says. "It makes me happy to be of service and to make someone's day better." Drawn to geriatric care because seniors are often underserved, Sharon brings warmth and intention to every visit. "Seniors can be the most grateful for special attention," she says. Her approach to building relationships is refreshingly human — she listens, makes eye contact, empathizes, and smiles. "Smiling helps too," she adds. Sharon is committed to addressing both big and small challenges her patients face. She connects patients with local Broward County services they may not know are available, believing that every little bit of support counts — especially for older adults who may be navigating life without a strong support system.

Originally from Cleveland, Ohio, Sharon now happily calls Florida home. When she's not caring for patients, she enjoys cooking healthy meals — including her signature sweet potato brownies — and soaking up the Florida sunshine outdoors.
