“They are vulnerable members of our society, and I wish to have an impact on their lives.”

About Kazi Anwar, MD

Dr. Kazi Anwar was inspired to pursue medicine by the compassionate care he witnessed his father's primary care provider deliver. That example stayed with him and shaped his dedication to serving the senior population. "They are vulnerable members of our society, and I wish to have an impact on their lives," he says. Dr. Anwar builds relationships by truly listening, acknowledging each patient's values and beliefs, and fostering a strong physician-patient relationship with the ultimate goal of achieving holistic, well-rounded healthcare.

Since joining ChenMed, Dr. Anwar has made it a priority to rebuild trust with patients who have gone without a permanent provider. "Many of my patients have been deprived of having a permanent provider, which has caused trust issues," he says. He is working to change that — bringing patients in more frequently to ensure all their medical concerns are fully addressed and that they feel confident in their care.

When not with patients, Dr. Anwar stays close to his faith, spends quality time with family and friends, watches sports, listens to music, and explores local restaurants with his wife.
